STANDARD FEATURES

Galvanized Steel Frame

Tubular structural steel, fully hot dip galvanized, provides the ultimate finish for any boat trailer. Tubular design shrouds wiring and brake lines from damage. All machining and welding is performed before galvanizing, so there are no surfaces left unprotected from a boat trailer's ultimate enemy: corrosion.

Bias-Ply Tires

High quality USDOT-rated tires. Standard on all 5 STARR, pontoon, skiff and jon models, and models 90" wide and narrower. Easily upgraded to radial tires at time of order.

Torsion Axles

Torsion axles provide independent suspension, exceptional rigidity, corrosion resistance, and a far superior ride to any leaf spring suspension. Available on most models.

NMMA / NATM Certified

Each year Load Rite trailers undergo a detailed inspection process in order to earn the right to proudly display this certification on products we manufacture.

Greaseable Hubs

Trailer with peace of mind knowing that you've inspected the condition and topped off the lubricant level in each hub of your trailer.

DOT Rated Tires and Lighting

All Load Rite original equipment tires and lighting components are fully DOT approved.

Cushioned Support Rails

Soft support for canoes and kayaks minimizes direct contact with galvanized steel.

Plastic Fenders

Impact-resistant plastic fenders.

2 Plus 3 Years Limited Warranty

OPTIONS

Tongue Jack

Tongue jacks are recommended on all trailers. Appearance and specifications vary by application. Tongue jacks are optional on all models where not original equipment.

Spare Tire and Carrier

The most important option to consider, every trailer should have a spare tire readily available. Consult dealer for recommended bracket for individual application.

LED Lighting

LED lights offer far greater reliability than incandescent fixtures. Long-lasting and waterproof design make these lights ideal for any trailer application.

Heat Shrink Wire Splices

Upgrade from standard silicone gel-filled connectors to heat-shrunk connections for a little extra peace of mind.

Radial Tires

Smoother riding and longer wear life than many bias-ply tires. A highly recommended upgrade.
